BioTaiwan 2017 – BioBusiness Asia Conference

Date & Time: Jun. 28 - 29, 2017

Location: Taipei, Taiwan

Organizer: Taiwan Bio Industry Organization

One of CBA's missions is to connect biotech/life science industries in US and Asia, especially China and Taiwan. We are happy to share that CBA participated in several aspects of this year's BioTaiwan, the biggest biotech conference in Taiwan. Several CBA members, including two former presidents, attended 2017 BioTaiwan and made great connections there with companies ranging from contract manufacturing organizations, instrument and reagent manufacturers to therapeutic and diagnostic ones from around the world. Since late 2016, CBA board helped nominate innovative companies for the company presentation session in BioTaiwan which is popular with the audience. A former CBA president presented there and attracted inquiries from several investors. Additionally CBA attempted to arrange a tour for CBA members attending BioTaiwan to visit selected biotech companies in Taiwan; unfortunately this task was not achieved due to insufficient enrollment. If any CBA members wish to participate in next year's BioTaiwan and the tour of Taiwan's biotech companies, please let any board member know soon, so we can plan and inform members timely.

Summer Picnic

Date: Aug. 19, 2017

Location: Mitchell Park, 600 East Meadow Drive, Palo Alto, CA

Organizer: Chinese Bioscience Association

A fun weekend for the families of CBA members and friends with an attendance of over 80. Good music and great food. Excellent time to catch up with old friends and network with new friends.

ITRI and DCB Event

Date: Sept. 18, 2017 (12:00PM to 2:30PM)

Location: Joy Restaurant, 1489 Beach Park Blvd, Foster City, CA 94404

Event Coordinator: Sean S.H. Wang, President of ITRI International Inc. (a subsidiary of ITRI)

In this exceptional luncheon host by ITRI and DCB, Dr. Chii-Wann Lin, the Vice President & General Director of Biomedical Technology and Device Research Laboratories from ITRI, and Herb Wu, Interim CEO of Development Center for Biotechnology (DCB), came to invite networking between them and biotech and pharmaceutical companies at Bay area for collaborative opportunities in US, Taiwan, as well as nations all over the world.

It was a great and successful event with multiple presentations, including led by Dr. Lin and Dr. Wu, and after following by guests from different companies to exchange their past experiences and also to discuss their future directions in biomedical field.

CBA would be delightful to continue on promoting communications in biotech and industry communities at Bay Area through support of nation-wide interactivities with our commitment.
